

MYRIAN KATTO

Full Stack Developer

I'm a Japanese-Brazilian Web Developer. After working with graphic design for almost 8 years, I've decided to switch my career to something more challenging. I just graduated from an intensive Full Stack Web Development bootcamp and now I'm looking forward to putting all this new knowledge in practice combined with my design skills. I'm looking for an opportunity in the tech industry where I can continue learning, collaborating, creating and developing new great innovative solutions for the world.
